

## **Did you really**

### **Carl Henry**

She's an angel, got me under her spell  
Every time I leave she starts to question me  
All her friends I know they've been talking about me  
What they hear and not what they see

#### **CHORUS:**

Did you really think I'd ever leave you  
After all the things that we've been through  
No shorty I ain't going out like that  
Why would you really think I'd ever leave you  
After all the things that we've been through  
Hey shorty for sure I still want you

I get faded every time I look at you  
You seem jaded girl what am I gonna do  
Why are you listening to all those haters  
Girl I'm right here and I ain't going no where

#### **BRIDGE**

I promise you, that I would be there through the thick and thin  
I promise you, that I would love you girl forever and today  
So why did you think that I would leave you
